PROGRAM DETAILS

Phlebotomy techs collect blood and non-blood specimens for testing so that specimens can be analyzed in a clinical laboratory. Blood and non-blood tests are used to diagnose illness, evaluate the effectiveness of medications and determine whether a patient is receiving proper nutrition. They talk with patients to help them feel less nervous about having their blood drawn. Phlebotomy procedures include verifying the patient's identity to ensure proper labeling of specimens and entry of information into a database. Keeping a clean, sanitary, and safe work environment is extremely important so they can avoid infection or contamination. Phlebotomists also assemble and maintain equipment such as needles and specimen containers

Phlebotomists work in clinical laboratories, hospitals, community health centers, nursing homes, doctor's offices, blood donation centers and other healthcare facilities. They are usually supervised by a clinical laboratory technologist or other medical professional. In medical and diagnostic laboratories, patient interaction is sometimes only with the phlebotomist. This allows a unique opportunity to positively impact patient experience.

The Registered Apprenticeship program is comprised of MedCerts online training programs as well as 2000 hours of on-the-job training with a sponsoring employer. MedCerts Apprenticeship programs combine class training and "on-the-job training" to provide individuals the opportunity to apply the knowledge and skills learned with an employer to quickly become a strong contributor in the workplace.

Throughout the Phlebotomy Technician program, students will learn to:

-  Gain knowledge of medical terminology, disease processes, anatomy and physiology
-  Become familiar with healthcare settings and the role of the phlebotomy technician
-  Understand the responsibilities of patient care and safety related to preparation and collection complications
-  Grasp the importance of customer service, communication skills and professionalism
-  Appreciate the role of HIPAA, OSHA, COLA, and CLIA-waived testing

While MedCerts training and related target certifications may be accepted and/or approved by your state of residency, employers reserve the right to dictate pre-requisite education, experience, or certification/licensure requirements for their positions. These requirements may exclude a MedCerts graduate from eligibility. We strongly advise students to research target job posts from area employers and relevant state requirements, barriers or restrictions to ensure eligibility upon graduation.

Some training programs and/or certifications may not be accepted in your state, please review our [State Restriction](#) page to confirm eligibility

CAREER SERVICES

For all MedCerts Students that are not affiliated with an employer partner, you also have the added benefit of Job Search Assistance including guidance with resume building, networking, interviewing, and job search tips.

ATTAINABLE CAREERS

- Clinical Laboratory Technician
- Endoscopy Technician

| HI-1014 | Introduction to Human Anatomy and Medical Terminology | 96 | 6 | PDF |
| HI-6100 | Phlebotomy | 64 | 4 | eBook |

EXPERIENTIAL/CLINICAL COMPONENT:

Experiential/Clinical Component Requirements:
Students are responsible for locating and securing a site to fulfill the clinical requirements of the program. MedCerts cannot guarantee placement to complete this clinical requirement. Students are also required to complete 30 venipunctures and 10 capillary sticks within 180 days of passing the CPT exam. MedCerts is not responsible for locating or placing students to fulfill any clinical certification requirements. MedCerts may choose to sponsor the student(s) by signing affiliation agreements with the site(s) of clinical learning and provide insurance coverage enabling the student to learn on the job. The CPT certification will not be released until student completes the clinical requirements within the 180 day timeframe of passing the CPT Exam.

CRIMINAL BACKGROUND CHECKS AND DRUG SCREENING POLICY:

MedCerts does not perform criminal background checks, nor do we test students for illicit drug use. Please be advised that while MedCerts does not perform these checks, the student's drug, criminal, or immunization status may prevent clinical/externship placement and future employment as a healthcare or IT professionals. Externship sites, employers, and State Boards of Pharmacy or other regulatory boards have regulations about immunizations, drug use, and criminal backgrounds. Regulatory boards, externship sites, employers, and other organizations that may require these screenings for placement, and adverse results may prohibit you from moving forward in the program. Candidates with a felony conviction are not eligible to participate in ANY MedCerts program that includes the Pharmacy Technician certification as a primary or secondary certification

The student understands that MedCerts does not hold any control over the drug, immunization, criminal, or background screening processes or policies held by any organization outside of MedCerts.

Upon 100% completion of this program, students will receive a "MedCerts Certificate of Program Completion." This is proof of completion of training but isn't a nationally recognized certification. Students are expected to take and pass the national certification exam through the issuing authority for recognized certification in their field.

Please carefully review the above program specific information and contact your Student Success Advisor if you have any questions or require further clarification of the contents.
